

# THE 7-DAY ATTENTION RESET

---

Reclaim your focus in a world designed to steal it.

*A 7-day science-backed workbook*

7 DAYS

7 EXERCISES

7 REFLECTIONS

---

Let's Begin

## BEFORE YOU START

# Read this. It takes 60 seconds.

Your attention is the most valuable thing you own. Every app, every notification, every infinite scroll is competing for it 24/7. This 7-day protocol helps you take it back. One day. One win. At a time.

### HOW TO USE THIS

- ☐ Work through one day at a time. Don't skip ahead.
- ☐ Keep your phone in another room during exercises.
- ☐ Fill in every blank — writing rewires faster than reading.
- ☐ Finished a day? Celebrate. Then show up tomorrow.

### YOUR 7-DAY JOURNEY

**DAY 01** **The Digital Kill-Switch**  
Stop the pings. Start the progress.

**DAY 02** **The Snap Audit**  
Find your attention leaks in 5 minutes.

**DAY 03** **The Monk Sprint**  
One task. Zero noise. 100% impact.

**DAY 04** **The Focus Sprints**  
Level up your mental endurance.

**DAY 05** **The Fortress**  
Design a space where focus is the only option.

**DAY 06** **The Dopamine Reset**  
Recover your edge through strategic boredom.

**DAY 07** **The Attention OS**  
Build a system that works so you don't have to.

Let's Begin

DAY 01

# The Digital Kill-Switch

*Stop the pings. Start the progress.*

## THE SCIENCE

Every notification triggers a **cortisol spike** — the same stress hormone your ancestors got from predators. Over time your brain starts to **expect interruption**, making sustained focus feel physically uncomfortable.

## THE 3-MINUTE STEALTH SETUP

Open your phone settings. Do these 3 things right now:

- ☐ Silence the Ghosts: Settings > Notifications. Turn OFF everything except Calls and Texts.
- ☐ Go Greyscale: Accessibility > Display > Colour Filters. Enable greyscale. Removes ~40% of addictiveness.
- ☐ Delete your #1 time-waster app today. You can reinstall it tomorrow if you really want to.

## THE GHOST-TOUCH CHALLENGE

Every time you reach for your phone and there's nothing to see, mark a tally below. Count your urges before bed.

|                                                              |                                                                |                                                              |
|--------------------------------------------------------------|----------------------------------------------------------------|--------------------------------------------------------------|
| <p>MORNING</p> <div><div></div></div> <p>mark your urges</p> | <p>AFTERNOON</p> <div><div></div></div> <p>mark your urges</p> | <p>EVENING</p> <div><div></div></div> <p>mark your urges</p> |
|--------------------------------------------------------------|----------------------------------------------------------------|--------------------------------------------------------------|

## REFLECTION

Without the red dots yelling at you today, what was the one thing you actually *noticed* in the real world?

Your answer:

*"Almost everything will work again if you unplug it for a few minutes. Including you."*

— Anne Lamott

Step 1 of 7

## DAY 02

# The Snap Audit

*Find your leaks in 5 minutes.*

### THE STAT THAT CHANGES EVERYTHING

**Every interruption costs 23 minutes of focus recovery.** Most people interrupt themselves every 3 minutes — meaning they never actually reach deep focus at all.

### YOUR ATTENTION ASSASSINS

Check everything that stole your time in the last 48 hours:

- ☐ Instagram / TikTok / Reels scrolling
- ☐ Email refresh (the infinite F5)
- ☐ The "quick" news / weather check that turns into 30 minutes
- ☐ Desktop notification pings
- ☐ The "I'll just look this up" Google rabbit hole
- ☐ YouTube autoplay
- ☐ WhatsApp group chats
- ☐ People interrupting while you work

### THE 60-SECOND POWER MOVE

#### THE INSTANT WIN

Flip your phone face down and move it to the other side of the room. **Done? You just improved your focus by ~20%.** Research shows even a phone face-down on your desk consumes working memory — just by existing in your peripheral vision.

### REFLECTION

"If I reclaimed the 2 hours I lose to \_\_\_\_\_, I would finally have time to \_\_\_\_\_."

Complete it here:

*"What you pay attention to is what becomes your life."*

— Winifred Gallagher

DAY 03

# The Monk Sprint

*One task. Zero noise. 100% impact.*

## THE SCIENCE

**Multitasking is a lie.** Every tab-switch or text-check loses you 40% of your brainpower to 'Switching Cost.' Today we stop leaking energy and do one thing — completely — at a time.

## CHOOSE YOUR LEVEL

Pick the one that feels like a stretch — not a wall:

6

**SPRINTER**  
**20 min**

Easy

6

**RUNNER**  
**40 min**

Medium

6

**MONK**  
**60 min**

Hard

## CLEAR THE DECK

- ☐ Close every browser tab not needed for your task.
- ☐ Put your phone in a drawer in a different room.
- ☐ Open your task. Set your timer. Start.

## THE ENTRY RITUAL

### THE FOCUS TRIGGER

Put on headphones (even without music) or grab a glass of water. This tells your brain: **'The Sprint has started.'** Repeat every session and it becomes automatic.

## THE PARKING LOT

Stray thought? Don't leave the task. Drop it here and keep going.

P PARKING LOT — stray thoughts go here, keep moving

- 1.
- 2.
- 3.

## REFLECTION

My one task was:

The hardest moment was:

I feel: (circle one) Productive / Relieved / Tired / Surprised

*"The mind is not a vessel to be filled, but a fire to be kindled."*

— Plutarch

Step 3 of 7

DAY 04

# The Focus Sprints

*Level up your mental endurance.*

## THE SCIENCE

**Start small to win big.** If you try to lift 100kg on Day 1 at the gym, you quit. Most people fail at focus because they attempt 2-hour sessions and burn out. Today: interval training for your brain.

## THE 25/5 GAME — 4 ROUNDS

Complete all 4 sprints. Score your focus after each:

☐ Sprint 1 — 25 min focus + 5 min break

Score:

☐ Sprint 2 — 25 min focus + 5 min break

Score:

☐ Sprint 3 — 25 min focus + 5 min break

Score:

☐ Sprint 4 — 25 min focus + 5 min break

Score:

## THE GOLDEN RULE OF BREAKS

During your 5-minute break: **DO NOT check your phone.** Walk, stretch, or stare at a wall. Checking your phone extends re-focus time by up to 15 minutes.

## THE 20-20-20 EYE RESET

Every break: look at something **20 feet away** for **20 seconds**. Resets screen fatigue and lowers cortisol.

## THE PEAK FINDER

My highest focus score was Sprint #  — this tells me I'm sharpest at:

What distracted me most today:

*"You will never reach your destination if you stop and throw stones at every dog that barks."*

— Winston Churchill

Step 4 of 7

# The Fortress

*Design a space where focus is the only option.*

## THE SCIENCE

**Willpower is a finite battery.** If you have to fight the urge to check your phone, you've already lost half your energy. Today we use Architecture — changing the environment so your brain has no choice but to work.

## THE 3-POINT SWEEP

### ☐ VISUAL SILENCE

Clear everything off your desk except your computer/notebook and a drink. If it's not for the task, it's a distraction.

### ☐ THE DIGITAL MOAT

Install a site blocker (Cold Turkey / Freedom) and lock your top 3 distraction sites for the next 2 hours.

### ☐ THE OUT-OF-SIGHT RULE

Phone goes in a drawer in a different room. A phone on your desk reduces cognitive capacity even face-down.

## THE FOCUS ANCHOR

### BUILD A SENSORY TRIGGER

Choose one scent (candle), playlist (lo-fi / white noise), or drink. **Use it ONLY in Fortress Mode.** Your brain associates it with 'Go Time' within 2 weeks.

## MY 3-STEP FOCUS RITUAL

Step 1 (e.g. Headphones on):

Step 2 (e.g. Phone in drawer):

Step 3 (e.g. Coffee sip):

## REFLECTION

What is the #1 item in your environment that tricks you into procrastinating? How did you neutralize it today?

Your answer:

*"Environment is the invisible hand that shapes human behaviour."*

— James Clear

# The Dopamine Reset

*Recover your edge through strategic boredom.*

"Your brain is like a sponge. If it's constantly soaked in digital noise, it can't absorb new ideas. Today we wring it out."

## THE SCIENCE IN 3 BULLETS

- **Sleep** = Memory consolidation. One bad night = 40% drop in focus.
- **Movement** = New brain cells (BDNF protein). Even a 20-min walk counts.
- **Boredom** = Creativity. Your best ideas come when there's no noise to drown them out.

## YOUR 3 RECOVERY MISSIONS

### MISSION 1: The Silent Walk

20 min, no phone/podcast. Notice 3 things you've never seen before.

### MISSION 2: The 30-Min Buffer

Phone goes to 'charging jail' outside bedroom 30 min before bed.

### MISSION 3: The Morning Shield

Don't touch your phone until after your first coffee or breakfast.

## THE IDEA CATCH

### CAPTURE THE BREAKTHROUGH

During boredom your Default Mode Network activates — this is when creative breakthroughs happen. Carry paper on your walk. If a great idea hits, jot **one word** and keep walking.

## THE RECOVERY CHECK

How itchy was your thumb to check your phone during the walk? (1–10):

The most interesting thought I had when there was nothing to distract me:

*"Almost everything will work again if you unplug it for a few minutes. Including you."*

— Anne Lamott

DAY 07

# The Attention OS

*Build a system that works so you don't have to.*

## THE AUTOMATION SECRET

*"You don't rise to the level of your goals — you fall to the level of your systems." — James Clear*

Today we stop *trying* to focus and start *defaulting* to it. We set the rules so your brain doesn't have to decide every morning.

## YOUR ATTENTION OPERATING SYSTEM

Fill in your 3 Core Rules:

### THE MORNING RULE

I will not touch my phone until:

### THE DEEP WORK RULE

Time of my daily Monk Sprint:

### THE SHUTDOWN RULE

Time my phone goes to charging jail:

## THE BEFORE VS. AFTER

DAY 1 SCORE

DAY 7 SCORE

|                      |                      |                      |
|----------------------|----------------------|----------------------|
| <input type="text"/> | <input type="text"/> | <input type="text"/> |
|----------------------|----------------------|----------------------|

## THE 90-DAY VISION

"If I keep this system for 90 days, the one big project I will finally finish is:"

Step 7 of 7

CERTIFICATE OF COMPLETION

# THE 7-DAY ATTENTION RESET

This certifies that

*has completed all 7 days of the protocol*

## YOU FINISHED.

Most people never finish what they start. You did. That puts you ahead of 90% of people who opened this workbook.

### POST-RESET COMMITMENTS

- ☐ One Monk Sprint every single day
- ☐ Phone stays out of the bedroom at night
- ☐ Social media only in designated windows
- ☐ One real boredom walk per week (no earphones)
- ☐ Revisit your Attention Score in 30 days and compare
- ☐ Share this workbook with one friend who needs it

### YOUR ATTENTION PLEDGE

I commit to protecting my attention as the valuable resource it is. I will not let algorithms, notifications, or endless scrolling dictate where my mind goes. My focus is mine.
